

Reject NAB's petition 04-160. Why exactly does NAB care if Sat radio broadcasts local content? Maybe it is because it brings much needed competition to local radio stations and they would rather not have any competition by LAW? Sat radio local content is value added to the consumer and should not be stopped by law. It's time for local radio stations AND NAB to listen to what the public wants. It's not time for them to put their deep pockets and money ahead of what is good for the public. Laws are made to protect consumers and the public, NOT limit their choices.
